

Ex : 8 Configuring GRC / Risk Dashboards for Management Reporting**Date: 3.08.2026****Aim:**

To review the Eramba GRC dashboard and use it to provide management-level visibility into tasks, risks, risk scores, and risk treatments.

Procedure:

- Log in to the Eramba application using the configured administrator credentials.
- Navigate to Dashboard from the left-side menu.
- Review the available dashboard sections such as:
 - Expired Tasks
 - Today Tasks
 - Future Tasks
- Review the Asset Based Risks Matrix section displayed on the dashboard.
- Navigate to Risk Management → Business Risks.
- Review the list of configured Business Risks.
- Verify the following information for the listed risks:
 - Risk Analysis Score
 - Risk Analysis Classification
 - Risk Treatment

Output:

Result:

The Eramba GRC Dashboard and Business Risks Register provide a centralized view of GRC activities, tasks, risk scores, risk classifications, and risk treatments, enabling management to monitor and review organizational risks effectively.
