

Ex : 9 Compliance Assessments: Test of Design and Test of Operational Effectiveness

Date: 03.08.2026

Aim:

To perform a compliance assessment in Eramba by evaluating whether controls are appropriately designed (Test of Design) and whether they operate effectively in practice (Test of Operational Effectiveness).

Procedure

- Log in to the Eramba application using the configured administrator credentials.
- Navigate to Compliance Management from the left-side menu.
- Select the appropriate Compliance Analysis/Assessment section and review the available compliance requirements.
- Select a compliance requirement or control that needs to be assessed.
- Perform the Test of Design (ToD) by checking whether the control is properly designed to address the identified compliance requirement or risk.
- Record the assessment result and supporting evidence for the Test of Design.
- Perform the Test of Operational Effectiveness (ToOE) by checking whether the control has been implemented and is operating effectively in practice.
- Record the operational assessment result, supporting evidence, observations, and any identified deficiencies.
- Review the overall compliance assessment results and identify controls that require improvement or corrective action.
