Introduction to SIEM

Date: 25.07.2026

Aim:

To learn the fundamentals of Security Information and Event Management (SIEM) and explore its features and functionality in cybersecurity.

Task:

Task 1: Introduction

Answer the questions below

What does SIEM stand for?

Security Information and Event Management system

✓ Correct Answer

Task 2: Logs Everywhere, Answers Nowhere

Is Registry-related activity host-centric or network-centric?

host-centric

✓ Correct Answer

Is VPN-related activity host-centric or network-centric?

network-centric

✓ Correct Answer

Task 3: Why SIEM?

Read the task above.

No answer needed

✓ Correct Answer

Task 4: Log Sources and Ingestion

In which location within a Linux environment are HTTP logs stored?

/var/log/httpd

✓ Correct Answer

Task 5: Alerting Process and Analysis

Which Event ID is generated when event logs are removed?

104

✓ Correct Answer

What type of alert may require tuning?

False Positive

✓ Correct Answer

Task 6: Lab Work

After clicking on the *Start Suspicious Activity* button, which process caused the alert?

culdominer.exe

✓ Correct Answer

Find the event that caused the alert and identify the user responsible for the process execution.

chris

✓ Correct Answer

What is the hostname of the suspect user?

HR_02

✓ Correct Answer

Examine the rule and the suspicious process; which term matched the rule that caused the alert?

miner

✓ Correct Answer

Which option best represents the event? Choose from the following:

Which option best represents the event? Choose from the following:

- False Positive

- True Positive

True Positive

✓ Correct Answer

Selecting the right ACTION will display the FLAG. What is the FLAG?

THM{000_SIEM_INTRO}

✓ Correct Answer

Task 7: Conclusion

Complete this room.

No answer needed

✓ Correct Answer

Result:

Successfully gained knowledge of SIEM, including log collection, event analysis, threat detection, and security monitoring, helping organisations identify and respond to cyber threats.
